SPECIFICATION

MICROCEMENT SHOWER FLOOR

Supply of microcement coating Creativo Microcement for application in the shower and on shower floors, available in more than 1000 colours, with glossy, satin or matt finis. Microcement and resin system with a maximum thickness of 2-3 mm, with CE-marking as per UNI EN 13813 standard, HACCP certified for use in food environments, R9 for anti-slip properties (DIN 51130). For application in the shower the system has a low water-absorption coefficient W3 (UNI EN 1062-3:2012) and medium vapour-permeability V2 (UNI EN ISO 7783:2012). The application of Creativo Microcement in the shower and on the shower floor shall be carried out following the instructions for surface preparation and application provided by the manufacturer in the relative technical data sheet and application manual. It is possible to apply Creativo Microcement in the shower including the shower floor, always following the instructions provided by the manufacturer. The application of the protective PU topcoat Creativo Top should be carried out in 3 coats of which the last two with double catalysis. The application shall be carried out only by trained and experienced applicators.
